

Detailed Daily Training Diary – SOC Analyst Intern (DLP)

Training Duration: 05 January 2026 – 05 July 2026

Department: Cybersecurity Operations Center (SOC)

Role: SOC Analyst Intern – DLP / DSPM

Working Days: Monday to Friday (Saturday & Sunday Off)

FEBRUARY 2026

SIEM, EDR, DLP & DSPM Learning Phase

02 February 2026

Learned the process of onboarding log sources into SIEM platforms. Understood how servers, endpoints, and security devices send logs for centralized monitoring.

03 February 2026

Studied suspicious login detection and authentication monitoring. Reviewed examples involving brute force attempts and unusual login activities.

04 February 2026

Observed endpoint security alerts generated through SentinelOne EDR. Learned how analysts review malicious process execution and suspicious file activity.

05 February 2026

Received training on Indicators of Compromise (IOCs) including malicious domains, hashes, IP addresses, and URLs. Learned IOC validation techniques.

06 February 2026

Studied incident response lifecycle including preparation, detection, containment, eradication, recovery, and lessons learned.

09 February 2026

Learned how PowerShell misuse can indicate malicious activity. Reviewed examples of suspicious script execution and encoded commands.

10 February 2026

Received introduction to Forcepoint DLP architecture. Learned about endpoint DLP, email DLP, web DLP, and policy enforcement mechanisms.

11 February 2026

Studied Forcepoint DSPM concepts and data discovery processes. Learned how organizations identify and classify sensitive data stored across systems.

12 February 2026

Learned different categories of sensitive information including PII, PCI, PHI, financial records, employee data, and confidential business documents.

13 February 2026

Observed how DLP policies generate incidents when users attempt unauthorized data transfer activities.

16 February 2026

Studied data classification methods and organizational data handling standards. Learned the importance of protecting confidential and restricted information.

17 February 2026

Reviewed sample DLP incidents and observed how analysts investigate policy violations related to sensitive data sharing.

18 February 2026

Learned regex fundamentals used for pattern-based detection in DLP systems. Practiced creating basic regex patterns for email IDs and phone numbers.

19 February 2026

Worked on creating keyword-based detection rules in a testing environment. Learned how policies detect confidential terms and data patterns.

20 February 2026

Studied removable media monitoring and USB data transfer controls implemented through DLP solutions.

23 February 2026

Observed web and email DLP monitoring activities. Learned how uploads, attachments, and data sharing attempts are inspected.

24 February 2026

Reviewed endpoint data transfer monitoring and file movement detection techniques.

25 February 2026

Learned alert validation techniques and proper incident documentation procedures for DLP-related alerts.

26 February 2026

Practiced correlating SIEM and endpoint alerts to identify suspicious activities across multiple systems.

27 February 2026

Completed technical training assessment covering SIEM, EDR, DLP, DSPM, networking, and cybersecurity fundamentals.
