

Detailed Daily Training Diary – SOC Analyst Intern (DLP)

Training Duration: 05 January 2026 – 05 July 2026

Department: Cybersecurity Operations Center (SOC)

Role: SOC Analyst Intern – DLP / DSPM

Working Days: Monday to Friday (Saturday & Sunday Off)

JUNE 2026

Independent DLP Monitoring, Incident Response & Operational Reporting

01 June 2026

Today, I independently handled daily DLP monitoring activities under the supervision of senior analysts. Reviewed incidents generated through endpoint, email, and web monitoring channels. Learned how to prioritize alerts based on severity, sensitivity of data involved, and potential business impact. Assisted in validating policy violations and documenting investigation summaries within the incident management system.

02 June 2026

Reviewed high-severity DLP incidents involving confidential organizational documents and sensitive employee information. Analyzed policy triggers, affected users, transfer methods, and destination details associated with each incident. Learned how analysts determine escalation requirements for incidents involving critical business data exposure.

03 June 2026

Worked on incident escalation procedures and coordinated with internal teams for alert validation and remediation activities. Learned how communication between SOC analysts, IT teams, HR departments, and business units is maintained during incident investigations. Assisted in updating escalation records and tracking investigation progress.

04 June 2026

Monitored endpoint file transfer activities involving USB devices, shared folders, and local storage systems. Reviewed incidents related to unauthorized copying of sensitive files and confidential reports. Learned how endpoint DLP agents track user actions such as file transfers, print activities, clipboard operations, and external device usage.

05 June 2026

Prepared detailed investigation summaries for escalated incidents reviewed during monitoring operations. Included technical observations, affected systems, policy details, user actions, remediation recommendations, and final incident classifications. Learned how professional reporting supports audit requirements and management review processes.
